

C51

iMago CART SERIES | COLOR DOPPLER ULTRASOUND SCANNER

[ADAPTIVE SPECKLE REDUCTION ALGORITHMS](#)
[CODED EXCITATION](#)
[DEPTH DEPENDENT DYNAMIC FILTERING TECHNOLOGY](#)
[FREQUENCY & SPATIAL COMPOUND IMAGING](#)
[MOTION-DEPENDENT PERSISTENCE ALGORITHM](#)
[WINDOWS BASED MOTION DEPENDENT PERSISTENCE](#)
[TISSUE HARMONIC IMAGING](#)
[TISSUE HARMONIC IMAGING FROM PHASE INVERSION](#)
[TISSUE SPECIFIC SOUND SPEED ADJUSTMENT TECHNOLOGY](#)
[TISSUE DOPPLER IMAGING](#)
[TISSUE MOTION ANALYSIS \(VECTOR DISPLAY\)](#)
[PANORAMIC AND WIDE FIELD OF VIEW \(FOV\) IMAGING](#)
[PANORAMIC IMAGING IN COLOR & POWER MODE](#)
[FREEHAND 3D ULTRASOUND](#)
[3-D PW SPECTRUM FOR FLOW VELOCITY PATTERN DISPLAY](#)
[2-D FLOW PROCESS WITH ADAPTIVE WINDOW](#)
[4-D PICTURE FORMING CAPABILITY](#)
[VECTOR DATA RE-ANALYSIS OF STORED IMAGES](#)
[DIRECTIONAL POWER DOPPLER FLOW IMAGING](#)
[MIXED SIDE BY SIDE DISPLAY MODES](#)
[AUTOMATIC IMT MEASUREMENTS FOR VASCULAR STUDIES](#)
[INVESTIGATION M-GATE OR ANATOMIC M-LINE](#)
[REAL TIME ELASTIC STRAIN IMAGING OPTION](#)
[REMOTE SYSTEM DIAGNOSTIC FUNCTION](#)
[4 ACTIVE PROBES](#)

The iMago C51 is a high-end machine in an elegant modern design cart system. This senior member of a scalable family of products offers a long list of patent pending technologies with new powerful imaging tools, enhanced ease of use, and versatility to help you deliver clear diagnoses, and allows your entry into new specialities like Oncology.

Best of both worlds – great images with incredible visualization and functional tools.

- Can differentiate hard from soft tissue which could be related to benign or malignant tumor with elastic imaging option.
- Ease of detecting tissue motion along any line of interest. It is not limited to the beam line.
- The motion pattern will reveal the tissue characteristics much better, for example the cardiac motion, vascular flow.
- Can see extended field of view in Color and Power Doppler modes.

Productivity features and support services for a busy medical community.

Vector data storage for you to come back and create optimized pictures with new parameters.

Offer all software tools including B, M, Doppler modes, and Vascular, Cardiac, Urology, OB/GYN, Oncology (elastic) packages for measurement and calculations.

And, for your machine to stay healthy as well, we offer remote diagnostics and service capability besides the field engineers at your service.
